## Seamless Steel Pipes from Stock

Over the last few months, we have expanded our product portfolio with seamless, heavy wall steel pipes and tubes. Meanwhile all ordered pipes and tubes are available. We are now able to offer seamless, heavy wall pipes with outer diameters from 33.7 mm up to 660 mm and thicknesses from 2.3 mm up to 100 mm directly from stock.

Our S355J2H, E355+AR, P355N and S355G15+N materials are particularly suited for applications in steel working, mechanical engineering, pipeline construction as well as offshore. We would be pleased to find the optimum pipe and tube solution with respect your requirements and needs.

## New High-Rack System operates successfully

Fast availability of materials in combination with lean internal processes for material handling are our company guidelines to ensure your satisfaction. We have, therefore, implemented a further investment in our warehouse technology by integrating a new and modern high-rack system. Designed by the German Manufacturer KASTO, the system was built in 2012 and installed some months ago.

The new system includes 1,386 cassettes – each with a length of 14 metres and capable of bearing up to six tons of material. The new high-rack system is directly connected with our merchandise management system. This automatic system guarantees a reliable and fast commission at any time. With this investment we release capacities for a further growth.

## New on Board

We are pleased to introduce a new team member: Since January 2013, Corinna Niemeyer has strengthened our sales team. Mrs. Niemeyer is an engaged and technically experienced specialist.

She has many years of experience in the field of pipes and tubes. Her fluent English, Spanish and French makes her a competent contact person for our export partners worldwide. You can contact Corinna Niemeyer on extension number – 13 or by mail: corinna.niemeyer@stahlrohr.eu.

She will be pleased to answer your requests.
